

FOR EXTERNAL ANIMAL USE ONLY

Epi-Otic®

Reg. No. G2399 (Act 36/1947)

ANTISEPTIC, DRYING EAR PREPARATION FOR USE IN DOGS AND CATS.

■ STORAGE INSTRUCTIONS

Store below 25 °C and protect from sunlight and heat.

■ COMPOSITION

Sodium EDTA	0,5 % m/v
Salicylic acid	0,2 % m/v
PCMX (Parachlorometaxylenol)	0,2 % m/v
Docusate sodium	0,5 % m/v
Monosaccharide complex (Rhamnose, Galactose, Mannose)	0,15 % m/v

■ INDICATIONS

EPI-OTIC is an ear-cleansing agent with drying and antiseptic properties intended for use in dogs and cats. It removes necrotic tissue and debris from ear lesions, dries the ear canal, thereby providing an optimal environment for tissue regeneration.

EPI-OTIC is indicated for use in the following conditions:

- Routine cleansing of the external ear and ear canal, particularly for cleansing of moist, waxy or odiferous ears, or the removal of necrotic tissue and debris from ear lesions.
- To facilitate examination of the ear canal.
- Prior to application of other medication or therapy.
- In the management of otitis media.

■ WARNINGS

- Keep out of reach of children, uninformed persons and animals.
- Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

■ PRECAUTIONS

Avoid contact with eyes.

■ DIRECTIONS FOR USE - Use only as directed
SHAKE WELL BEFORE USE

Turn the white nozzle to open the bottle and then apply to the ear canal. Squeeze the bottle gently. EPI-OTIC should be liberally applied. Gently massage the base of the ear and then wipe the interior of the ear flap and accessible parts of the ear with cotton wool that has been soaked with EPI-OTIC.

Routine Cleaning: EPI-OTIC may be used twice or three times weekly.

Pre-Treatment: EPI-OTIC may be used before each application of antibiotics or any other therapy. In every case, follow the instructions provided by the veterinarian.

EPI-OTIC is an extremely well-tolerated, highly-efficient ear cleanser.

Salicylic acid associated with the surfactant / wax solvent system facilitates the removal of cellular debris and excessive wax as well as drying the ear canal.

PCMX in association with EDTA helps to restore the microbial balance in the ear canal, while the inclusion of monosaccharides has a soothing effect as well as limiting the binding of bacteria to the skin surface.

■ PRESENTATION

White bottle with plastic screw-on applicator cap containing 60 ml and 125 ml liquid.
