

MultiDip

NEW

CATTLE

- Controls ticks and kills lice.
- Offers a tick-detaching effect.
- Controls nuisance, biting and face flies.
- Protects against screw worm infestation.

PLUNGE DIP

FRESH FILL (CHARGE)

1,5 L TO 1000 L WATER

REPLENISH

3 L TO 1000 L WATER

CYMAZOLE

175 g/l

CYPERMETHRIN

25 g/l

SPRAY RACE

FRESH FILL (CHARGE)

1,5 L TO 1000 L WATER

Boost the spray wash by adding 200 ml of MultiDip **after every 100 head of cattle dipped.**

NOTE: It is not good spray race practice to carry dip wash over from one spraying to the next. Only make up sufficient wash for each spraying (\pm 3 litres per head plus the amount for the pump system).

HAND SPRAYING

15 ml PER 10 L WATER

Thoroughly wet the animal by spraying from below upwards so that the hair is lifted by the spray. Concentrate on the ears, under the tail and in the tail brush.

DIPPING INTERVALS:

TICKS, FLIES AND SCREW WORMS: Dip or spray weekly

LICE: Dip or spray when necessary
