Flukazole C

FOR THE CONTROL OF LIVER FLUKE, ROUNDWORMS, LUNG-WORMS AND TAPEWORMS IN CATTLE.

◆ STORAGE INSTRUCTIONS
Store below 30 °C in a cool dry place.

◆ CAUTION
Do not slaughter animals for human consumption within 28 days of dosing.
Do not dose lactating cows whose milk or milk products are intended for human consumption.
Do not use less than 7 days before calving, in cows where milk and milk products from treated cows may be used for human consumption.
Where accidental treatment with Flukazole C takes place within the 7-day period, milk must not be used for human consumption, or be supplied for processing for at least 14 days following treatment. Calves fed this milk within 10 days of slaughter must not be used for human consumption.
Containers and any residual contents should be disposed of safely (e.g. by breaking, crushing, puncturing or burying). Empty containers and product should not be burned.
Dangerous to fish. Do not contaminate dams, rivers or streams with the drench or used container.
Keep out of reach of children, uninformed persons and animals.
Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

◆ PRECAUTIONS
Wash hands after use.
Avoid contact with eyes and skin. May cause irritation.
Rinse the medicated drench three times after use. Do not dispose of undiluted chemicals.
Wash equipment thoroughly after use.
First aid: If swallowed, and if more than 15 minutes from a hospital, induce vomiting.

◆ PRESENTATION
1 L and 5 L opaque HDPE bottles with poly-propylene cap.

Definition: * Controls (≥ 90 % effective)

Flukazole C also controls tapeworm in cattle. Milk tapeworm (<i>Moniezia</i> spp.). Class 1 (100 % effective in 80 % of the treated animals)

**Ovicidal:** Roundworm eggs present in the animal at the time of dosing are prevented from hatching. Cattle should not be placed on clean pasture until 6 hours after drenching.

**Liver Fluke:** Flukazole C is used for the treatment of susceptible early immature, immature and mature Liver Fluke.
The list contains the more important endoparasite species. This anthelmintic may also be effective against other species. For more information contact your veterinarian.

**DIRECTIONS FOR USE**
Use only as directed. Shake before use.

**Cattle:** Dosage: 1 ml / 10 kg body mass orally. This dose delivers 12 mg Triclabendazole per kg body mass and 4.53 mg Oxfendazole per kg body mass.
Cattle in excess of 650 kg body mass should be dosed at 5 ml per 50 kg body mass. Dose the group according to the body mass of the heaviest animal in the group.
